## PREFACE

A fairly good command over law subjects is essential for any law graduate to become a successful lawyer or a judge. Then which is the best way to deal with all the major, minor & local laws? Mere reading of bare act is not sufficient to enhance legal knowledge. Linking method is the one such unique & revolutionised way to study all the procedural & substantial laws.

Linking Laws technique provides better chances of success in imparting knowledge of the statutory provisions and also developing insight into the subject. This linking approach is designed to make subjects more interesting and meaningful. The arrangement of sections of a statute is done in such an impressive way that it will assist a learner to go through several statutes in a single stroke.

After going through this study material, a learner would surely be able to acknowledge that linking approach is an adequate method to study the basic fundamental principles of law along with the analysis of relevant sections.
